8

NOTES ON OCTOBER 21, 1962 MEETING WITH THE PRESIDENT

1. The meeting was held in the Oval Room at the White House and lasted from 11:30 a.m. to approximately 12:30 p.m. In attendance were the Attorney General, General Taylor, General Sweeney and the Secretary of Defense.
2. The Secretary of Defense stated that following the start of an air attack, the initial units of the landing force could invade Cuba within 7 days. The movement of troops in preparation for such an invasion will start at the time of the President's speech. No mobilization of Reserve forces is required for such an invasion until the start of the air strike. General LeMay had stated that the transport aircraft, from Reserve and Guard units, which would be required for participation in such an invasion, can be fully operational within 24 to 48 hours after the call to active duty.
3. The Secretary of Defense reported that, based on information which became available during the night, it now appears that there is equipment in Cuba for approximately 40 MRBM or IRBM launchers. (Mr. McCone, who joined the group 15 or 20 minutes after the start of the discussion, confirmed this report.) The location of the sites for 36 of these launchers is known. 32 of the 36 known sites appear to have sufficient equipment on them to be included in any air strike directed against Cuba's missile capability.
4. We believe that 40 launchers would normally be equipped with 80 missiles. John McCone reported yesterday that a Soviet ship believed to be the vessel in which the Soviets have been sending missiles to Cuba has made a sufficient number of trips to that island, within recent weeks, to offload approximately 48 missiles. Therefore, we assume there are approximately that number on the Island today, although we have only located approximately 30 of these.
5. General Sweeney outlined the following plan of air attack, the object of which would be the destruction of the known Cuban missile capability.
  - a. The 5 surface-to-air missile installations, in the vicinity of the known missile sites, would each be attacked by approximately 8 aircraft; the 3 MIG airfields defending the missile sites would be covered by 12 U.S. aircraft per field. In total, the defense suppression operations, including the necessary replacement aircraft, would require approximately 100 sorties.
  - b. Each of the launchers at the 8 or 9 known sites (a total of approximately 32 to 36 launchers) would be attacked by 6 aircraft. For the purpose, a total of approximately 250 sorties would be flown.
  - c. The U.S. aircraft covering the 3 MIG airfields would attack the MIG's if they became airborne. General Sweeney strongly recommended attacks on each of the airfields to destroy the MIG aircraft.

~~TOP SECRET~~

6. General Sweeney stated that he was certain the air strike would be "successful"; however, even under optimum conditions, it was not likely that all of the known missiles would be destroyed. (As noted in 4 above, the known missiles are probably no more than 60% of the total missiles on the island.) General Taylor stated, "The best we can offer you is to destroy 90% of the known missiles." General Taylor, General Sweeney and the Secretary of Defense all strongly emphasized that in their opinion the initial air strike must be followed by strikes on subsequent days and that these in turn would lead inevitably to an invasion.

7. CIA representatives, who joined the discussion at this point, stated that it is probable the missiles which are operational (it is estimated there are now between 8 and 12 operational missiles on the island) can hold indefinitely a capability for firing with from 2-1/2 to 4 hours notice. Included in the notice period is a countdown requiring 20 to 40 minutes. In relation to the countdown period, the first wave of our attacking aircraft would give 10 minutes of warning; the second wave, 40 minutes of warning; and the third wave a proportionately greater warning.

8. As noted above, General Sweeney strongly recommended that any air strike include attacks on the MIG aircraft and, in addition, the IL28s. To accomplish the destruction of these aircraft, the total number of sorties of such an air strike should be increased to 500. The President agreed that if an air strike is ordered, it should probably include in its objective the destruction of the MIG aircraft and the IL28s.

9. The President directed that we be prepared to carry out the air strike Monday morning or any time thereafter during the remainder of the week. The President recognized that the Secretary of Defense was opposed to the air strike Monday morning, and that General Sweeney favored it. He asked the Attorney General and Mr. McCone for their opinions:

a. The Attorney General stated he was opposed to such a strike because:

- (1) "It would be a Pearl Harbor type of attack,"
- (2) It would lead to unpredictable military responses by the Soviet Union which could be so serious as to lead to general nuclear war.

He stated we should start with the initiation of the blockade and thereafter "play for the breaks."

b. Mr. McCone agreed with the Attorney General, but emphasized he believed we should be prepared for an air strike and thereafter an invasion.
